23 July 1958

MEMORANDUM FOR: AD/RR

ATTENTION : [REDACTED] 25X1A9a

SUBJECT : Request for City Plans for SR Division

25X1A9a

1. We very much appreciate your indicated concern over our critical operational needs for specialized city plans. The enclosed lists represent our priorities and specifications for city plan production. It has been our pleasure to work on this problem with [REDACTED] Chief of Geographic Research Area and his Deputy, [REDACTED] 25X1A9a

2. Our most urgent need is for base line maps, showing only street layouts (without street names), major urban complexes, and principal topographical features. Accordingly, Attachment A lists, in order of current priority, our needs for such base plans and describes more fully our limited overlay requirements. Subsequently, overlays of these same plans with street names are then desired.

3. Attachment B reflects our requirements for city plans which contain considerably more overlay details. The desired annotations, likewise are indicated. However, base line maps for this list of cities are also required, according to the specifications contained in paragraph 2 and in Attachment A.

4. These lists should be considered flexible enough in their priority ratings so that existing work in progress may be exploited for sooner output on some items. This and other aspects of the project undoubtedly will benefit from a working liaison between the analysts of our respective components. We will gladly cooperate in any way we can, including the furnishing of any relevant data in our files.
